VULTR AGENT RUSH · BLAST RADIUS ZERO

The Detonation Ocean

Search any known threat.
Watch exactly what it does to a computer, safely, on Vultr.

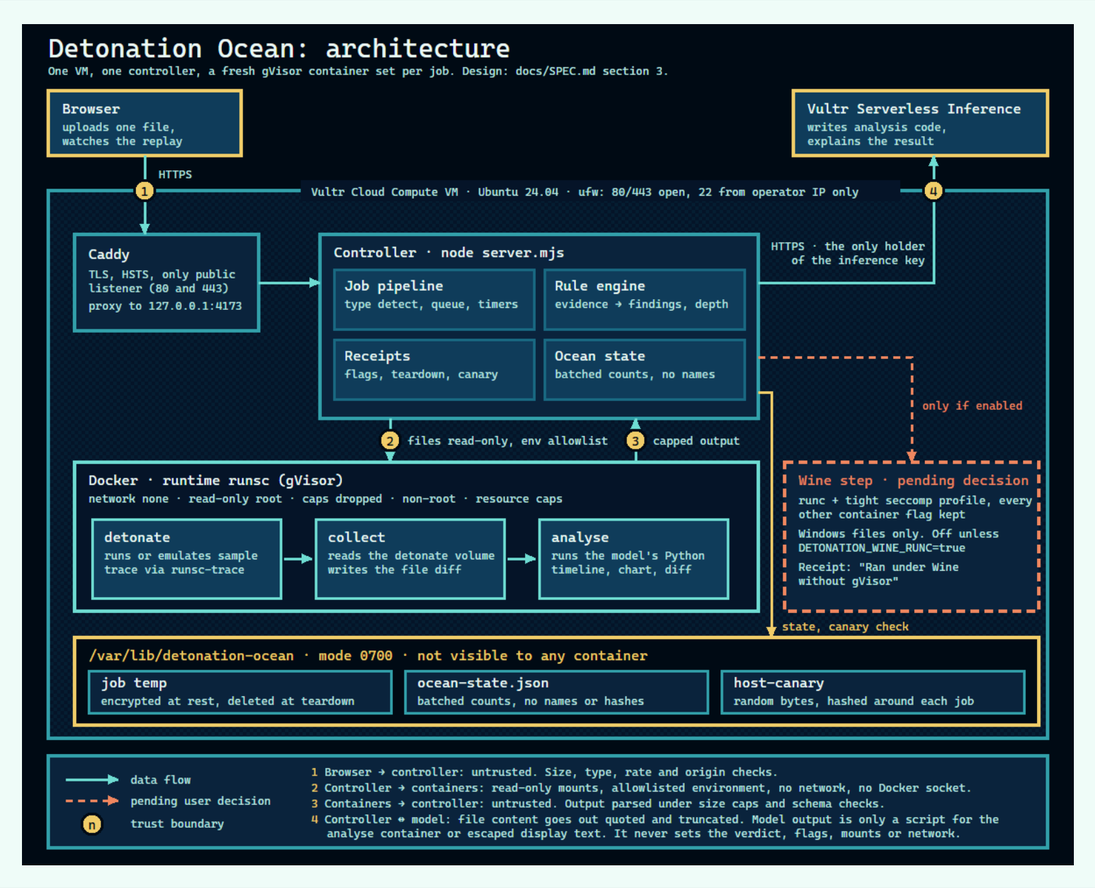

THE PROBLEM

Attacks stay abstract

- Most people only meet attacks as **headlines** or **walls of logs**.
- Seeing an attack unfold is what actually teaches people to spot it.
- Agents that **run code** make it worse: the blast radius is whatever they can touch.

HOW IT WORKS

Contained by design

- **Vultr Cloud Compute** runs the controller.
- Anything that executes runs in throwaway **gVisor** containers: no network, read-only root, no secrets, hard limits.
- **DeepSeek V4.1 Flash on Vultr Serverless Inference** writes scene scripts and analysis code, and explains results.
- **Fixed rules**, not the model, decide the verdict.
- Every container is destroyed, and a

WHO IT'S FOR

Security you can see

- **Security-awareness trainers** showing how real attacks unfold.
- IT helpdesks and small teams with **no security staff**.
- Next: every search researched and built live, end to end.
